Product Description

Projector housing moistureproof box is waterproof, dustproof and moisture-proof.

Product Description:

Projector outdoor moisture-proof box is a kind of equipment specially used to protect the projector from temperature, humidity and other factors in the outdoor environment. It is usually composed of shell, insulation layer, refrigeration system and control system.

1. Shell: The shell is usually made of high-strength metal materials, which can effectively resist external shock and vibration and protect the internal equipment from damage.
2. Insulation layer: The insulation layer is usually made of insulation material, which can effectively prevent the loss of heat and keep the temperature inside the box stable.
3. Refrigeration system: The refrigeration system is usually composed of compressors, condensers, evaporators and expansion valves, which can effectively regulate the temperature in the box.
4. Control system: The control system usually consists of microprocessor and sensors, which can automatically adjust the operating state in service according to the set temperature to ensure the temperature in the box is stable
