Product Description

Custom Service Grey Outdoor Air Conditioned Network Enclosure for Outdoor Environment**Description:**

One of the key features of this cabinet is its accessories. It comes equipped with fans to ensure proper ventilation and cooling of the air conditioning unit, as well as a thermostat to control the temperature inside the cabinet. Additionally, a heater is included to protect the unit from freezing in colder temperatures. The cabinet also comes with a mounting plate to make installation quick and easy.

The cable entry for this cabinet is located at the bottom, making it easy to route cables in and out of the unit. The cabinet is designed for wall mounting, providing a secure and stable location for your air conditioning unit. It is also built to withstand extreme temperatures, with an operating range of -40°C to +55°C. Whether you're dealing with freezing temperatures or scorching heat, this cabinet will keep your air conditioning unit running smoothly.

The double-layer insulated door on this cabinet provides an additional layer of protection against the elements. It also helps to reduce noise and vibration from the air conditioning unit, making it a great choice for outdoor installations in residential or commercial areas.

In summary, if you're in need of a high-quality electrical enclosure cabinet for your computer room air conditioning unit or in row air conditioning unit, the Air Conditioning Outdoor Network Cabinet is an excellent choice. With its durable construction, useful accessories, and easy installation, it provides a great solution for keeping your air conditioning unit safe and performing at its best.
