Product Description

Product Description

Air-conditioned projector enclosures are specialized protective cases designed to safeguard projectors from harsh environmental conditions. These enclosures are typically made from durable materials such as steel or aluminum, and are designed to **withstand extreme temperatures, moisture, and dust**.

One of the key features of air-conditioned projector enclosures is their **temperature control system**. This system allows for precise regulation of the internal temperature of the enclosure, which is critical for ensuring that the projector operates within the recommended temperature range. Some enclosures may use air conditioning units or fans to regulate temperature, while others may use passive cooling techniques such as heat sinks.

Another important feature of air-conditioned projector enclosures is their **waterproof rating**. Enclosures with an **IP65 rating** are able to withstand water jets and protect against moisture intrusion, making them suitable for use in outdoor environments where rain or water spray may be present

The product features:

1. Materials: FRP, stainless steel, and galvanized sheet spraying
2. Waterproof, weatherproof, insect protection, dustproof,antiseptic
3. Users can choose refrigeration, air conditioning, remote monitoring, internal heating, and other functions according to projector requirements and site conditions.

Outdoor Projector Enclosures Example:

Foreign customers come to visit the factory to buy products:

Specification	
item	value
Place of Origin	China
	Shenzhen, Guangdong
Brand Name	thisshirui
Cabinet Standard	According to customer's request
Protection Level	IP65
Type	Outdoor projector housing
External Size	can customize
Material	Powder paint
Type	Equipment Enclosure
Product Name	Outdoor projector housing
Material	Galvanized sheet
Surface treatment	Powder paint
Application	Outdoor Projector box
Function	climate control
Custom Service	Offerable
Feature	OEM ODM Support
Color	Accept Customized
IP Rating	IP66Waterproof Box
Ambient Temperature	-15 to 50 degree (5-122)

Ambient Humidity	0-100%
Temperature Control	5-40°C
Humidity Control	10-80%
Voltage and Frequency	220V-50HZ

Packaging & Shipping

To better ensure the safety of your goods, professional, environmentally friendly, convenient and efficient packaging services will be provided.

Outdoor Projection Box ,

Product design

CAD drawing for approval

Swimming pool options for extreme humidity and heat,

High humidity – Cave systems/underground/tunnel options for damp environments,

Portrait, landscape or inverted

Any number of doors,

Thermal insulation,

Any mounting i.e. uni-strut or M8 threaded studs,

Any RAL colour finish,

Any orientation - Vertical, landscape or portrait,

Company Information
